last verified

Prepared by GG Advisory Pty Ltd · gg-advisory.com.au

August 2026

OVERVIEW

How to use this radar

This radar is a curated overview of current and recurring funding pathways for Australian climate-tech founders and investors: grants, accelerators, equity funds and concessional finance. Programs are grouped by national and state or territory coverage, and each is tagged by funding type and current status. Because the funding landscape moves quickly, program status, deadlines and eligibility can change.

> Information last verified: 31 August 2026. Program status, deadlines and eligibility can change without notice. Always verify directly with the administering body before applying.

21	12	9	3
funding pathways tracked	national programs	state and territory programs	status categories

Status

Rolling | **Opening soon** | **Closed, monitor**

Funding type

Grant | **Accelerator** | **Equity Investment** | **Debt + Equity**

READING THE FUNDING TYPES

Grants are generally non-dilutive but competitive and milestone-based. Accelerators may be non-dilutive or equity-linked. Equity investment requires investor fit and negotiation. Debt and equity facilities are typically for larger, bankable or near-bankable projects. Each card also lists a best-fit stage and a source link. Figures are indicative: verify current deadlines, amounts and eligibility directly with the administrator before applying.

READING THE AMOUNTS

Funding figures may refer to a total program pool, a per-project grant, an accelerator investment, or a fund size. Co-contribution means the applicant must contribute eligible cash or matched funding. TRL refers to technology readiness level, from proof-of-concept through to demonstration and deployment.

SECTION 1

National programs

ARENA Advancing Renewables Program

Grant | National | Rolling

FUNDING	Flexible, no fixed cap per project	**DEADLINE**	Always open
STAGE	Development, demonstration, pre-commercial deployment (TRL 4+)	**ADMINISTERED BY**	Australian Renewable Energy Agency (ARENA)

Overview. ARENA's foundational program funds development, demonstration, and pre-commercial deployment across all renewable energy and grid technologies. No fixed cap per project; milestone-based disbursement. Submit an EOI in ARENANet — ARENA staff recommend calling before submitting. Recent examples include $5M to a Queensland critical minerals startup (February 2026).

Why it matters. Covers the widest range of clean energy technologies of any national program. Suitable for companies with working prototypes ready for demonstration at scale.

Best fit: Development, demonstration, pre-commercial deployment (TRL 4+)

https://arena.gov.au/funding/advancing-renewables-program/

Australia's Economic Accelerator (AEA) — Ignite & Innovate

Grant | National | Closed, monitor

FUNDING	Ignite: up to $500,000 (12 months); Innovate: up to $5,000,000 (proof-of-scale)	**DEADLINE**	Rolling rounds — monitor aea.gov.au for next opening
STAGE	University research teams with industry co-applicant (Ignite: proof-of-concept; Innovate: proof-of-scale)	**ADMINISTERED BY**	Department of Education / Australian Government

Overview. Australia's $1.6 billion Economic Accelerator funds university research commercialisation through two streams. Ignite grants (up to $500K, 12 months) support proof-of-concept and laboratory testing; Innovate grants (up to $5M) advance technologies from lab to proof-of-scale via industry-university collaboration. Round 1 allocated over $130M across 194 projects. Climate-tech, energy, and materials ventures regularly feature. Requires a university lead applicant with an industry co-applicant.

Why it matters. The primary pathway for deep-tech climate startups spun out of Australian universities to access non-dilutive federal commercialisation funding. Investors and founders with university IP should engage their tech-transfer office about a joint AEA application.

Best fit: University research teams with industry co-applicant (Ignite: proof-of-concept; Innovate: proof-of-scale)

Signals to watch: Round 2 details and opening dates are published on aea.gov.au. The $1.6B envelope means multiple rounds are expected across 2026–2030.

https://www.aea.gov.au/researcher-applicant/grants

Brinc / Artesian Clean Energy Accelerator

Accelerator | National | Rolling

FUNDING	$150,000 cash + $110,000 program support in exchange for equity ($30K participation fee deducted from investment)	**DEADLINE**	Rolling — applications accepted year-round
STAGE	Commercialisation-ready; validated product; min. 2 co-founders; Australian incorporated	**ADMINISTERED BY**	Brinc + Artesian Venture Partners

Overview. A 100% online 3-month accelerator backed by Artesian's Clean Energy Seed Fund, accepting Australian cleantech startups on a rolling basis. Startups receive $150K cash plus $110K in program support in exchange for equity, with follow-on capital of $200K–$2M available for high performers. Focuses on energy transition, renewable energy, and environmental impact reduction. Unique feature: a $30K participation fee is deducted from the investment at acceptance.

Why it matters. One of the few cleantech-exclusive accelerators in Australia with a rolling application process and clear follow-on capital pathway via Artesian. The online format removes geography barriers.

Best fit: Commercialisation-ready; validated product; min. 2 co-founders; Australian incorporated

Signals to watch: Artesian's Clean Energy Seed Fund can follow with $200K–$2M. Artesian is also active in CEFC-backed co-investment mandates, providing access to further institutional capital.

https://www.brinc.io/programs/accelerators/australia-cleantech-accelerator-program/

CEFC / Virescent Ventures Fund II

Equity Investment | National | Rolling

FUNDING	$150M+ fund; invests pre-seed to late stage	**DEADLINE**	Ongoing — apply directly to Virescent Ventures
STAGE	Pre-seed to late stage	**ADMINISTERED BY**	Clean Energy Finance Corporation (CEFC) via Virescent Ventures

Overview. Australia's largest dedicated climate-tech venture fund, backed by CEFC, Westpac, QIC, and Breakthrough Victoria. Virescent Ventures Fund II invests from pre-seed to late stage across climate hardware, software, and services. Apply directly to Virescent; no fixed application rounds or deadlines. VIC-based companies benefit from Breakthrough Victoria's 25% allocation requirement.

Why it matters. For startups that have cleared product-market fit and are ready for institutional equity, this is the most relevant Australian climate-tech fund currently deploying capital.

Best fit: Pre-seed to late stage

https://www.virescent.vc/

CSIRO ON Accelerate — Cohort 12

Accelerator | National | Opening soon

FUNDING	Up to $80,000 cash per team (non-dilutive); program valued at $150K+	**DEADLINE**	~Mid-2026 (subscribe: on@csiro.au)
STAGE	Pre-seed; research-driven ventures	**ADMINISTERED BY**	CSIRO

Overview. Australia's premier deep-tech non-dilutive accelerator for research-driven startups. Top teams receive up to $80,000 cash from the program's internal fund. Cohort 11 is underway with a showcase on 11 June 2026 in Melbourne. Cohort 12 applications are expected to open mid-2026. Climate-tech, energy, and materials ventures regularly feature.

Why it matters. The most prestigious non-dilutive pathway for early-stage deep-tech founders in Australia. Subscribe to on@csiro.au for early notification when Cohort 12 opens.

Best fit: Pre-seed; research-driven ventures

https://www.csiro.au/en/work-with-us/funding-programs/innovation-programs/on-accelerate

Future Made in Australia (FMIA) Innovation Fund — ARENA

Grant | National | Rolling

FUNDING	$1.5 billion total pool; no per-project maximum (min 50% co-contribution)	**DEADLINE**	Rolling — no fixed close date (launched December 2025)
STAGE	Demonstration to commercialisation (TRL 3+)	**ADMINISTERED BY**	Australian Renewable Energy Agency (ARENA)

Overview. ARENA's flagship $1.5 billion fund targets three priority streams: Green Metals ($750M for iron, steel, alumina, aluminium), Renewable Energy Technology Manufacturing ($200M for batteries, solar components, electrolysers), and Low Carbon Liquid Fuels ($250M for sustainable aviation fuel and renewable diesel). Minimum 50% co-contribution required. Grants above $50M require ministerial sign-off. Submit via Expression of Interest in ARENANet.

Why it matters. The largest single cleantech manufacturing opportunity in Australia's history. ARENA encourages early engagement before submitting an EOI — contact their team first.

Best fit: Demonstration to commercialisation (TRL 3+)

https://arena.gov.au/funding/future-made-in-australia-innovation-fund/

Hydrogen Headstart — Round 2

Grant | National | Rolling

FUNDING	Up to $2 billion total (Headstart Production Credits, per-kg revenue support over 10 years)	**DEADLINE**	EOI open — see arena.gov.au for key dates
STAGE	Greenfield to commercial scale; renewable hydrogen and derivatives (ammonia, methanol, green metals)	**ADMINISTERED BY**	Australian Renewable Energy Agency (ARENA)

Overview. Round 2 of ARENA's Hydrogen Headstart program provides up to $2 billion in Headstart Production Credits — revenue support per kilogram of renewable hydrogen produced over a 10-year operational period. Structured as a two-stage competitive process (EOI then Full Application). Eligible projects produce renewable hydrogen or derivatives such as green ammonia, methanol, or green metals at commercial scale. Part of the Future Made in Australia plan.

Why it matters. The primary federal subsidy mechanism for first-mover commercial-scale green hydrogen projects. The per-kg production credit structure de-risks offtake economics for large projects. Contact ARENA early via hydrogenheadstart@arena.gov.au before submitting an EOI.

Best fit: Greenfield to commercial scale; renewable hydrogen and derivatives (ammonia, methanol, green metals)

Signals to watch: The Hydrogen Production Tax Incentive ($2/kg refundable tax offset from 1 July 2027) is designed to complement Headstart, bridging the revenue gap until market prices reach parity.

https://arena.gov.au/funding/hydrogen-headstart-round2/

Industry Growth Program (IGP)

Grant | National | Rolling

FUNDING	$50,000–$5.25M matched grants (two tiers)	**DEADLINE**	Rolling — ~90% of initial pool projected spent by June 2026
STAGE	Early-stage commercialisation to growth	**ADMINISTERED BY**	Department of Industry, Science and Resources / business.gov.au

Overview. The federal government's primary SME commercialisation program offers matched grants aligned with National Reconstruction Fund priorities including renewables, low-emissions technologies, and critical minerals. Tier 1: Early-Stage Commercialisation ($50K–$250K, dollar-for-dollar matched). Tier 2: Commercialisation & Growth ($100K–$5M). Applications are always open but approximately 90% of the initial funding pool was projected to be spent by June 2026.

Why it matters. One of the only national programs directly supporting cleantech SMEs at early stage. Apply urgently — the pool is depleting. The NRF Net Zero Fund (concessional debt/equity, $3B+) is expected to open mid-2026 as a growth-stage complement.

Best fit: Early-stage commercialisation to growth

Signals to watch: NRF Net Zero Fund expected to open mid-2026 for larger growth-stage capital needs.

https://business.gov.au/grants-and-programs/industry-growth-program

Main Sequence Ventures — Fund III

Equity Investment | National | Rolling

FUNDING	A$450M fund (A$1B under management total); invests seed to Series B in deeptech	**DEADLINE**	Ongoing — apply directly to Main Sequence via mseq.vc
STAGE	Seed to Series B; research-driven deeptech with clear decarbonisation or industrial transformation thesis	**ADMINISTERED BY**	Main Sequence Ventures (MSEQ)

Overview. Main Sequence Ventures, the CSIRO-founded deeptech VC, completed the first close of its A$450M Fund III in 2025 with LPs including CSIRO, Hostplus, Australian Ethical Investment, Temasek, and the Grantham Foundation. Fund III focuses on fibres, food, decarbonisation, and advanced manufacturing. MSEQ leverages CSIRO's research network to identify and back scientists turning discovery-stage research into transformative businesses. Total AUM now A$1B.

Why it matters. The most credible path to institutional equity for CSIRO-affiliated or research-backed climate and materials startups. MSEQ's CSIRO connection provides unique IP access, lab infrastructure, and strategic validation that no other Australian VC can replicate.

Best fit: Seed to Series B; research-driven deeptech with clear decarbonisation or industrial transformation thesis

Signals to watch: MSEQ is the largest LP in CSIRO's A$150M commitment through Australia's Economic Accelerator (AEA). Startups coming through AEA Ignite/Innovate have a natural pathway to MSEQ consideration.

https://www.mseq.vc/

National Reconstruction Fund — Net Zero Fund

Debt + Equity | National | Closed, monitor

FUNDING	$5 billion (concessional debt, equity, and guarantees; target return: 5-yr bond rate minus 1%)	**DEADLINE**	Implementation expected mid-2026 — monitor nrf.gov.au
STAGE	Growth to industrial scale; large-scale industrial decarbonisation and manufacturing	**ADMINISTERED BY**	NRF Corporation (NRFC) / Department of Industry, Science and Resources

Overview. The federal government's $5 billion Net Zero Fund within the NRF will provide highly concessional debt, equity, and guarantees to support industrial decarbonisation and scale-up of domestic low-emissions manufacturing. It targets large-scale facilities decarbonising operations and hard-to-abate sectors. Unlike the Industry Growth Program (which suits SMEs), this fund is designed for capital-intensive projects requiring tens to hundreds of millions of dollars. Full design has been finalised; implementation expected mid-2026.

Why it matters. The most significant new source of concessional growth-stage finance for deep industrial decarbonisation in Australia's history. Climate-tech ventures in green metals, sustainable fuels, or large-scale manufacturing should begin relationship-building with NRFC now.

Best fit: Growth to industrial scale; large-scale industrial decarbonisation and manufacturing

Signals to watch: The NRFC general portfolio (NRF priority areas, commercial terms) is already open. The Net Zero sub-fund will layer on additional concessionality from mid-2026. Register interest at nrf.gov.au.

https://www.nrf.gov.au/

R&D; Tax Incentive (R&DTI;)

Grant | National | Rolling

FUNDING	43.5% refundable tax offset (SMEs, turnover < $20M); 38.5%+ non-refundable (larger companies)	**DEADLINE**	Register within 10 months of financial year end (e.g. 30 April 2026 for FY25)
STAGE	Any incorporated Australian company conducting eligible R&D; activities	**ADMINISTERED BY**	ATO + Department of Industry, Science and Resources (DISR)

Overview. Australia's largest innovation incentive offers a 43.5% refundable tax offset on eligible R&D; expenditure for SMEs with turnover under $20M — effectively a cash rebate on R&D; costs. Eligible costs include wages for R&D; staff, contractor costs, and materials used in trials. Larger companies receive a non-refundable offset based on R&D; intensity. Register R&D; activities with DISR (via business.gov.au) before claiming in your tax return; registration must be lodged within 10 months of financial year end. The eligible expenditure cap was increased to $150M in recent amendments.

Why it matters. For any climate-tech startup conducting genuine technical experimentation — hardware prototypes, novel software, new materials processes — this is the single most accessible cash injection available. It's not a competitive grant; all eligible companies receive the offset.

Best fit: Any incorporated Australian company conducting eligible R&D; activities

Signals to watch: Consult an R&D; tax specialist before lodging — the ATO audits R&D; claims closely and requires contemporaneous records of technical uncertainty, hypothesis, experiments, and outcomes.

https://business.gov.au/grants-and-programs/research-and-development-tax-incentive

Startmate Accelerator — Winter 2026

Accelerator | National | Opening soon

FUNDING	$120,000 AUD equity investment (post-money valuation: $1.5M for first-time raisers)	**DEADLINE**	Winter cohort applications expected ~June–July 2026 (program Aug–Nov)
STAGE	Pre-seed to seed; idea-stage to early traction (67% of cohort pre-revenue)	**ADMINISTERED BY**	Startmate

Overview. Startmate runs Australia and New Zealand's most prominent 12-week accelerator twice per year (Summer: Feb–May; Winter: Aug–Nov). Climate-tech is a recognised priority sector and previous cohorts received CEFC Innovation Fund backing of $50K per company. Applications for the Winter 2026 cohort are expected to open June–July 2026. Startmate invests $120K for equity; valuation matched to prior rounds for founders who have already raised. Selection is mentor-driven across 3 stages over 3 weeks.

Why it matters. The highest-profile generalist accelerator in Australia with a strong climate-tech track record. Strong network effects: the Startmate community of founders, operators, and investors is one of Australia's most active and supportive.

Best fit: Pre-seed to seed; idea-stage to early traction (67% of cohort pre-revenue)

https://www.startmate.com/accelerator/program

SECTION 2

State & territory programs

ACT

ACT: Energy Innovation Fund

Grant | ACT | Rolling

FUNDING	Technology Demo: up to $10M pool, grants vary; Policy Challenge: $3.75M pool; Innovation Ecosystem: $3.25M pool	**DEADLINE**	Technology Demo stream: open year-round, assessed quarterly
STAGE	Businesses, research institutions, and non-profits; energy transition innovation in the ACT	**ADMINISTERED BY**	ACT Government — Environment, Planning and Sustainable Development Directorate (EPSDD)

Overview. The ACT's Energy Innovation Fund (formerly the Renewable Energy Innovation Fund / REIF) has invested $12M since 2016 and was expanded with an additional $19M commitment. Three streams: Technology Demonstration (up to $10M over 5 years, quarterly rolling assessment for energy tech businesses), Policy Challenge ($3.75M for solutions to ACT energy transition policy barriers), and Innovation Ecosystem ($3.25M for accelerator and ecosystem programs). Applications via SmartyGrants.

Why it matters. The ACT's primary grant channel for early-stage energy innovation, particularly valuable for startups seeking a smaller pilot-scale test market before national rollout. The quarterly rolling assessment means no fixed deadline pressure.

Best fit: Businesses, research institutions, and non-profits; energy transition innovation in the ACT

https://www.climatechoices.act.gov.au/policy-programs/energy-innovation-fund

NSW

NSW Net Zero Manufacturing Initiative (NZMI)

Grant | NSW | Opening soon

FUNDING	CTI stream: $250,000–$5,000,000 (50% co-contribution); LCPM/RM streams: $50K–$50M	**DEADLINE**	Round 2 in development — register interest at energy.nsw.gov.au/NZMI
STAGE	Innovation to manufacturing scale; cleantech, low-carbon products, renewable manufacturing	**ADMINISTERED BY**	NSW Climate and Energy Action / energy.nsw.gov.au

Overview. The NSW Government's $275 million Net Zero Manufacturing Initiative spans three streams: Clean Technology Innovation (CTI, $250K–$5M for R&D; and commercialisation), Low Carbon Product Manufacturing (LCPM, $50K–$20M for expanding manufacturing capacity), and Renewable Manufacturing (RM, $5M–$50M for renewable energy component production). Round 1 recipients have been announced; Round 2 details are being finalised. All streams require 50% co-contribution from non-NSW Government sources (cash only; in-kind excluded).

Why it matters. The most substantial manufacturing-focused cleantech grant program in NSW. CTI's commercialisation stream ($250K–$5M) is directly relevant to startups with validated technology seeking production scale-up capital.

Best fit: Innovation to manufacturing scale; cleantech, low-carbon products, renewable manufacturing

Signals to watch: Register interest at energy.nsw.gov.au/NZMI for Round 2 notification. Round 2 construction-ready streams expected to carry larger pools than Round 1.

https://business.gov.au/grants-and-programs/net-zero-manufacturing-initiative-low-carbon-product-manufacturing-nsw

NSW: I2N Cleantech Accelerator — University of Newcastle

Accelerator | NSW | Opening soon

FUNDING	Non-dilutive program support; IP support via Davies Collison Cave	**DEADLINE**	Next cohort applications expected ~April–July 2026 (programme Aug–Nov)
STAGE	Pre-Series A; any founder (not UNSW-affiliated required); Hunter/Central Coast focus but open nationally	**ADMINISTERED BY**	Integrated Innovation Network (I2N) / University of Newcastle

Overview. A 13-week cleantech-specific accelerator run by the University of Newcastle's I2N, backed by the federal Trailblazer for Recycling and Clean Energy (TRaCE) program. Accepts up to 12 teams per cohort across clean energy, recycling, water, transport, and supply chains. All founders receive IP and trademark support from Davies Collison Cave. The programme culminates in a Showcase event; selected companies enter an incubator phase through to June 2027. Open to any founder — no university affiliation required.

Why it matters. One of the only sector-specific cleantech accelerators outside Sydney and Melbourne, with genuine depth in clean energy and recycling commercialisation. TRaCE funding gives it stronger resource backing than typical university accelerators.

Best fit: Pre-Series A; any founder (not UNSW-affiliated required); Hunter/Central Coast focus but open nationally

Signals to watch: Applications typically open April, with an info session in May and programme starting August. Monitor hunternewenergy.com.au for next cohort announcements.

https://www.newcastle.edu.au/engage/business-and-industry/integrated-innovation-network-i2n/programs/accelerators/i2n-cleantech-accelerator

NSW: UNSW Climate 10x Accelerator (TRaCE Trailblazer)

Accelerator | NSW | Opening soon

FUNDING	Equity and/or non-dilutive support (details on application)	**DEADLINE**	Check unswfounders.com/accelerators for current intake
STAGE	Early-stage; clean energy and recycling startups	**ADMINISTERED BY**	UNSW Founders (federally funded via Trailblazer for Recycling and Clean Energy)

Overview. A two-phase accelerator funded by the federal Trailblazer for Recycling and Clean Energy (TRaCE) program. Phase 1 (Pre-X, 4 weeks) accepts 15 teams; Phase 2 (Accelerator, 10 weeks) takes the strongest through to investment readiness. Open to any Australian startup — no UNSW affiliation required.

Why it matters. Federal Trailblazer funding means this program has significant resources for participants compared to standard accelerators. Clean energy and recycling sectors particularly well served.

Best fit: Early-stage; clean energy and recycling startups

https://unswfounders.com/accelerators

QLD

QLD: Advance Queensland — Ignite Ideas Fund

Grant | QLD | Closed, monitor

FUNDING	Up to $100,000 (Tier 1) or $100,001–$200,000 (Tier 2); 20% matched contribution	**DEADLINE**	Next round TBC — monitor advance.qld.gov.au
STAGE	MVP to early commercialisation	**ADMINISTERED BY**	Advance Queensland (Queensland Government)

Overview. Provides up to $200,000 to Queensland-based startups at MVP to early commercialisation stage. Cleantech is an eligible priority sector. The current round is closed; Round 13 is expected to open in 2026. Pre-MVP ventures should also watch the Ignite Spark program ($50K–$75K for concept/prototype stage). 20% matched cash contribution required (10% for Indigenous businesses or regional applicants).

Why it matters. The primary non-dilutive commercialisation grant for Queensland startups. Monitor advance.qld.gov.au for Round 13 opening dates.

Best fit: MVP to early commercialisation

https://advance.qld.gov.au/grants-and-programs/ignite-ideas-fund

SA

SA: Green Industries SA — Circular Economy Grants

Grant | SA | Opening soon

FUNDING	Up to $100,000 (Business & Market Development) or $200,000–$2M (Circular Infrastructure)	**DEADLINE**	Check greenindustries.sa.gov.au for 2026 round status
STAGE	SME to established business; circular economy and recycling focus	**ADMINISTERED BY**	Green Industries SA (GISA)

Overview. Two grant streams available to South Australian businesses, councils, and research institutes. Business & Market Development grants (up to $100,000) support circular economy business development. Circular Infrastructure grants ($200,000–$2M, 50% co-contribution) fund recycling, resource recovery, and materials processing infrastructure. Check GISA's website for 2026 round opening dates.

Why it matters. SA's primary cleantech/circular economy grant channel. Businesses in materials, waste-to-energy, and recycling sectors should register their interest with GISA directly.

Best fit: SME to established business; circular economy and recycling focus

https://www.greenindustries.sa.gov.au/funding

TAS

TAS: ReCFIT Climate Change Business Innovation Grants

Grant | TAS | Closed, monitor

FUNDING	$25,000–$100,000; 30% cash co-contribution required	**DEADLINE**	Next round expected early–mid 2026
STAGE	SME ($500K–$55M turnover); climate action and low-emissions tech	**ADMINISTERED BY**	Renewables, Climate and Future Industries Tasmania (ReCFIT)

Overview. Tasmanian businesses with $500K–$55M annual turnover can access $25,000–$100,000 for climate action and low-emissions technology projects ($550,000 total pool per round; 30% cash co-contribution required). The previous round closed November 2025; outcomes and the next round opening are expected in early to mid-2026.

Why it matters. Tasmania's primary cleantech SME grant. Relatively small pool — early applications are advantaged. Monitor recfit.tas.gov.au for the 2026 round.

Best fit: SME ($500K–$55M turnover); climate action and low-emissions tech

https://www.recfit.tas.gov.au/grants_programs/climate-change/climate-change-business-innovation-grants

VIC

VIC: Breakthrough Victoria — Clean Economy Fund

Equity Investment | VIC | Rolling

FUNDING	$75M committed to VC funds; 25% must deploy into Victorian companies	**DEADLINE**	Ongoing — apply to backed funds (Virescent Ventures, Boson Ventures)
STAGE	Seed to growth	**ADMINISTERED BY**	Breakthrough Victoria (Victorian Government)

Overview. Breakthrough Victoria has committed $75M across five VC funds including Virescent Ventures Fund II. All BV-backed funds must deploy at least 25% of capital into Victorian companies. Startups apply directly to the VC funds (Virescent Ventures, Boson Ventures, etc.), not to BV directly. Clean economy is a priority sector.

Why it matters. Victorian cleantech founders should prioritise Virescent Ventures and Boson Ventures as their first equity contacts — BV's co-investment mandate increases deal size and credibility.

Best fit: Seed to growth

https://breakthroughvictoria.com/growth-sectors/clean-economy/

WA

WA: Founders Factory Nature Tech Accelerator

Accelerator | WA | Opening soon

FUNDING	$50,000 per startup + 4-month operational support	**DEADLINE**	Next cohort TBC — Feb 2026 cohort underway
STAGE	Pre-seed to seed	**ADMINISTERED BY**	Founders Factory / WA Government ($7.2M, 3-year commitment)

Overview. The WA Government has committed $7.2M over 3 years to Founders Factory's dedicated Nature Tech Accelerator. Each accepted startup receives $50,000 plus 4 months of product development, commercialisation, and fundraising support from the Founders Factory team. Eligible sectors: environmental technologies, nature-based solutions, cleantech, biofuels. The February 2026 cohort is underway; next intake dates are to be confirmed.

Why it matters. Western Australia's most direct pathway for early-stage environmental-tech founders. The $7.2M multi-year commitment signals ongoing cohort delivery — monitor foundersfactory.com for next intake.

Best fit: Pre-seed to seed

https://foundersfactory.com/western-australia-government-nature-tech-accelerator/

Sources and verification

Program details in this report are drawn from the source URLs recorded in the grants configuration and should be checked against official government, agency and administering-body pages current to 31 August 2026. Fast-moving items such as deadlines, funding levels and open or closed status should be re-checked with the administering body before acting.
